

exception

```
classDiagram
    class exception
    class __impl_Exception["__impl::Exception"] {
        + ~Exception()
        + Exception()
        + Exception()
        + Exception()
        + what()
    }
    __impl_Exception --|> exception
```

The diagram illustrates a class hierarchy. At the top is a class box labeled 'exception'. It has three horizontal compartments, with the top one containing the name. Below it is a class box for '__impl::Exception'. This box has three compartments: the top one contains the class name, the middle one is empty, and the bottom one contains a list of methods. A blue arrow with an open triangular head points from the top of the '__impl::Exception' box to the bottom of the 'exception' box, indicating inheritance.

__impl::Exception

+ ~Exception()
+ Exception()
+ Exception()
+ Exception()
+ what()
