

csTransform::SetO2TTranslation

```
graph LR; A[csTransform::SetOrigin] --> B[csTransform::SetO2TTranslation]; C[csTransform::Translate] --> B;
```

The diagram illustrates a relationship between three methods of the `csTransform` class. On the left is a grey-shaded box labeled `csTransform::SetO2TTranslation`. To its right are two white boxes: `csTransform::SetOrigin` at the top and `csTransform::Translate` at the bottom. Blue arrows point from each of these two boxes towards the grey box, indicating that both `SetOrigin` and `Translate` are associated with or inherit from `SetO2TTranslation`.
